Application No.: 10/542,217 Docket No.: SAE-0036

## **AMENDMENTS TO THE CLAIMS**

Please amend the following claims as indicated.

- 1. (Deleted)
- 2. (Deleted)
- 3. (Deleted)
- 4. (Currently Amended) (Currently Amended) A method of using of the G protein-coupled protein p2y9 comprising amino acid sequence substantially represented by SEQ ID NO:1 as a lysophosphatidic acid (LPA) receptor.
- 5. (Currently Amended) The method of using according to claim 4, wherein LPA is 1-acyl-LPA.
- 6. (Currently Amended) The use method of using according to elaim any one of claims 4 or 5, wherein p2y9 has un the amino acids sequence of SEQ ID NO:1 in the sequence listing.
- 7. (Previously Presented) A method for screening a compound which regulate physiological activities stimulated or inhibited by lysophosphatidic acid (LPA) by using lysophosphatidic acid (LPA) receptor comprising G protein-coupled protein p2y9.
- 8. (Original) The method according to claim 7, wherein the method is to screen the antagonist in use for carcinoma cell invasion.
- 9. (New) A method of using of the G protein-coupled protein p2y9 as a lysophosphatidic acid or the mutant which maintains the same function as a lysophosphatidic acid.
